Valuable comments and feedback

The initial front end coding went very well but as sub page design and e-commerce was worked on the QA and quality dropped a bit. Attention to detail could have been better as it took a few weeks to perfect the email confirmations for Pickup vs Delivery, etc. The end result is great and both I and the Client are extremely happy. My recommendation is to spend more time to fully understand the requirements from a business logic perspective.

Title

Your valuable feedback is very important for us to serve better project management services.

Thank You
